Recovery.gov: Recipient Data Map, data-date - 10/30/2010

Downloaded by Alliance - 10/31/2010

All data in the Recipient Reported Data section comes directly from the recipients of federal contract, grant, and loan awards (entitlements and tax benefits paid under Recovery are not included). The amounts in this document reflect cumulative totals from recipients' reports on completed and incomplete federal contracts, grants, and loans awarded from February 17, 2009 to June 30, 2010. **The job numbers reported by recipients are for Quarter 2, 2010 only (April 1 to September 30, 2010).**

NOTE REGARDING AGENCY REPORTED DATA:

According to Assistant Director of Content for Recovery.gov, the agency interactive data map and the text view has been removed from Recovery.gov. The data for this map was being pulled from USASpending and the Federal Procurement Data System both of which have data quality issues. The Act requires that Recovery.gov only display data from the recipients which is a far more accurate story about where and how the Recovery funds are being spent.

The Alliance has been reporting both recipient reported totals and agency reported totals for the state of TN; Shelby County, TN; and Congressional District 9 by contracts, grants, and loans. For now, we will postpone reporting data by agency.
